

# Essay planning

Sunday, 13 November 2022 16:16

Reason - Introduction → Government

→ <Back ground> → Many

→ Old rejected idea

→ What am I going to do

BG Research - Initial Research What is it  
of Blockchain

How

Pro

Con

Where.  
Who.  
When  
What  
Why  
How

set of grouped record <block>

↑  
transaction

differentiate of block chain

can define  
hash function

Existing Product

→ social media

→ Bitcoin

→ another social media

Pro and Cons  
How implement

Ethereum  
Global money  
or

Encryption method - Symmetric (SSL) Asymmetric (RSA)  
Cryptographic algorithm - Majority voting,  
- Hash function

ECC?

Show Planning

→ The graph + <Time management>

<Login, blockchain, database, UI,

Project breakdown

→ Blockchain arch

→ network protocol

Show how I did this → The website (post) [convert block]

→ The server side checking hash + [block to chain]

→ Topology + Serialization

HEADER  
Block  
\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

The problem faced

→ Not enough client

→ The connection between

→ socket.io do support → data scope

- Something.

Evaluation How who, Have tested it?

200 people

The improvement to be made

The Feedback → Easy to use  
→ helpful

Conclusion
